Procedure & Explanations

◆ Roll Call 【Ensure the number of present delegates】

The chair will call the country names in alphabetical order.

- Delegates with voting rights should reply “present and voting”.

Paper Writing

Opening Speech

◆ The purpose of the Opening Speech is to outline your position(s) on the issue(s) so that other delegates will know they can work with you during lobbying time. It is important to make a good first impression by speaking loudly, clearly, and making eye contact with your audience.

◆ Opening speech contains these parts:

- Formal Greeting
- Simple outline of this issue
- Country's position
- Possible solutions
- Inviting delegates to cooperate during lobbying

◆ Example:

[Greeting] Honorable chairs and distinguished delegates, the delegate of Indonesia is pleased to stand here before you today. **[Positions and possible solutions]** Indonesia thinks now that gangs—especially those in Latin America—not only cause security alarms but also financial problems. The delegate of Indonesia thinks that popularizing education is the most fundamental solution to this issue. Children, even the youth who have dropped out of school, can receive correct thoughts about the environment around them. As to other emergency situations such as drug trafficking, the delegate of Indonesia thinks that all governments should cooperate to find practical solutions.

[Inviting delegates to cooperate] The delegate of Indonesia is looking forward to successful cooperation with other countries on this issue. Thank you.

開場演說

◆ 代表在開場演說時須簡單闡述國家立場及解決方案

◆ 開場演說可分為三部分：

- 問候
- 發表本國對此議題概略的立場及解決方案
- 邀請立場相同的國家合作

◆ 範例：

問候 尊敬的主席及各位代表大家好，法國代表很榮幸今日能參與安全理事會議。**發表本國對此議題概略的立場及解決方案** 法國代表十分痛心並強烈意識到伊斯蘭國(ISIS)自去年大規模攻佔伊拉克及敘利亞的領土，使得大批的難民無家可歸並藉機佔據大片的油田。我們更無法忽視的是，伊斯蘭國透過石油走私、敲詐勒索、人口販賣以及國際間反西方人士私底下捐助而逐漸累積的龐大資金，在今日可謂最富有的恐怖組織。法國代表在此強力譴責伊斯蘭國殺害人質、虐待當地居民等慘無人道的行徑，並堅決反對任何妥協以及支付贖金的動作。法國代表在此呼籲各國加入美國所領導的空襲聯盟(US-led coalition)以對伊斯蘭國有進一步的制裁動作以在日後殲滅伊斯蘭國並恢復中東的和平，也強烈期待能與各國國際組織合作並與交戰各方協商，以在伊拉克及敘利亞等被伊斯蘭國占領的地區建立「人道走廊」等停火區以進行人道救援及醫療服務。**邀請立場相同的國家合作** 法國代表期待在今日會議與各位代表協議出對伊斯蘭國有制裁力的決議文，謝謝各位代表。

Position Paper

- ◆ Position paper is the basis of the draft resolution. The content should contain issue's background, previous solutions, and possible solutions.
- ◆ Position paper can be simply divided into three parts:

Position Paper

1st part:

Background/History:

- ☆ What is the issue? ☆ Why is it so serious?
- ☆ Where does it come from? (recent history)
- ☆ Where is it a major problem?

2nd part:

Previous Solution:

- ☆ What has been done before?
 - ☆ What is being done now?
 - ☆ Who are the key players? (UN, international organizations, NGOs)
- *You can do the research on the related news to find key players.

3rd part:

Your solution ideas:

- ☆ Write down 4~5 solutions.
- *Find key aspects/causes/effects (make the effects less terrible), and break the problems down into different parts (don't look at the whole issue) .
- *Solutions should focus on world wide solutions not only for your country but for the whole world.

◆ example:

Committee: Security Council

Country: Russia

Issue: Small Arms Sale in Africa

Russia has been deeply involved in the sale of small arms in Africa. Russia is the world's second largest exporter of arms, after the U.S. Russia has risen up recently to try to regain its former glory in the global arms trade. Its customers in Africa purchased 1.1 billion dollars worth of arms from Russia between 2000 and 2007.

Several measures have been taken by the UN since the 2001 Conference on the Illicit Trade in Small Arms and Light Weapons in All Its Aspects, but the proliferation of small arms is still a concern. Some major gun-producing countries such as the United States, China, Russia, India, and others are against universal criteria against arms export. Most importantly, the five permanent members of the Security Council – Russia, USA, England, France and China – add up to 88 percent of the global arms trade.

Small arms sales may be a problem in Africa, but it's not the source of the problem. As one the supplier of armaments, Russia acknowledged that even if Russia refuses to sell, African countries will still purchase weapons from others. However, by trading with Russia, Russia not only avoids creating mass conflict by paying attention to the recipient country's politics within the organization of technical-military cooperation, but also provides training and a flexible way of payment. Russia does no harm in these unstable areas.

It's the illegal, unofficial smuggling and contraband rings that severely cause the mass destruction and human rights abuse. According to Small Arms Survey, the illicit small arms trade is valued at US\$1 billion, or 10-20% of the global trade. Furthermore, almost all of these sales aren't from authorized export countries. These weapons are within a secondary circuit, which is of the most concern right now. Hence, Russia believes that the idea of monitoring the legal transfer of small arms is insufficient, radical, and unrealistic; it's the illicit traffic that the world needs to pay attention to.

Remember that most countries haven't established or enforced their national control and relevant laws over small arms. Fewer than 50 countries have specific legislation addressing the broker, or intermediary. (There is only one intermediary in Russia, as it's completely controlled by the government). National stockpile management and the control over surplus weapons are still needed to be robust, or it will be easy to access illicit trade. Establishing the unacceptability of arms re-exports and the end-use control of arms exporter needs to be put into practice. Furthermore, the concern about small arms needs to be emphasized.

◆ Example:

國家立場書(Position Paper)

委員會：經濟及金融委員會

議題：歐債危機

國家：葡萄牙

自2009年開始，由希臘開端的歐洲債務危機爆發，之後愛爾蘭、葡萄牙以及西班牙等國家的債務問題也浮上檯面，緊接著一連串的歐洲主權信評惡化、營行業體質的惡化，間接導致了金融業的緊張情勢，更甚影響了歐洲整體經濟的惡化。歐債危機國家所使用的緊縮政策，造成了進口、消費、企業投資以及出口的減少，使歐洲經濟停滯，也使得全球主要國家對歐盟出口的減少而造成國際股市受挫。歐美國家無法有效提振景氣以降低失業率，使得金融情勢的惡化以及經濟成長的疲緩產生惡性循環，歐債國家也在主權債務到期後違約以及再救助之泥淖之中。

綜觀歐洲債務危機，首先各歐債國面臨不同的國內問題，愛爾蘭、葡萄牙和西班牙的房地產泡沫化、希臘政府入不敷出以及國民的習慣性逃稅，和之後緊縮政策的過度實施所造成的社會問題更使得國內經濟雪上加霜。出口導向的經濟體系，使得各國需要舉債以消弭過度的花費所產生的經濟問題，使出口國以及赤字國之間債務關係的惡性循環。而歐洲國家之間生產力以及對外貿易的差異在本質上有著極大的落差，歐元區的形成，也使得邊陲國無法使用短期貨幣貶值使經濟做短期的回升之方式。歐元區內國家使用共同的貨幣，卻無統一的財政體系，也使歐盟在改善歐債問題的過程中更加棘手。2010年五月，歐盟(EU)、歐洲央行(ECB)和國際貨幣組織(IMF)的「三架馬車」(Troika)計畫給予希臘為期三年援助計畫，德國內閣也在同年批224億歐元援助希臘。2011年美國Fed聯合歐元區、英國、加拿大、瑞士央行共同調降美元換匯利率，減緩美元以及歐元流動性遲緩的問題。歐洲央行(ECB)也擴大銀行借貸能力等方式來確保市場之穩定。

我國認為，為自底基解決歐債問題，就以大範圍來看，歐元區應做經濟結構的改革—債權國不應將國內經濟重心放於特定產業使得國內經濟結構不平衡，而在債務危機爆發時使國內經濟動盪不安；而西班牙、葡萄牙與希臘自2010年以來，在結構性改頭上有大幅的進步，而反觀義大利以及法國則較為停滯不前，因此我國認為勞動市場結構的改革—例如：提高薪資協商流程的彈性等—是必要的。我國也呼籲各國在政策上，呼籲希臘及義大利要徹底打擊政府官員貪污現象以及國內逃漏稅之問題。也在此呼籲歐元區各國共同成立財政聯盟，統一財政體系，以利在債務問題之上各國可共同戮力。

Draft Resolution

- ◆ The draft resolution is the most important document that needs to be written by delegates before every MUN event. During lobbying, delegates will exchange their ideas based on their draft resolutions. A draft resolution includes a preamble and operative clauses.

Preamble:

- ☆ General background and situation of this issue
 - ☆ UN resolutions or NGOs actions (any actions related to this issue)
 - ☆ What can be improved
- *Do not make preamble too complicated. Just write general points.
 - *Each preamble should begin with a gerund (V+ing or V+ed) in italics, using commas to connect the sentences. (附錄 1)

Operative clauses:

- ☆ Delegates' solutions to this issue
- *A clause should be clear and actionable. Each clause should focus on one clear idea
 - *Plagiarism will not be tolerated. It should be your own idea.
 - *Each clauses should begin with present third-tense singular verbs (附錄 2)
 - *Form: 1. Clause (the solution) (**WHAT**)
 - a. Sub-clause (clarify the solution) (**HOW**)
 - i. Sub-sub-clause (details) (**WHO, WHEN, WHERE**)
 - *There is only one period in a draft resolution (in the last sentence)

QUESTION OF: Reducing Air Pollution and PM2.5 Levels

SUBMITTED BY: Taiwan

The Environment Committee

Recalling the COP21 Climate Change Summit in Paris, France, concluded in December, 2015, in which participating nations reached a landmark agreement to combat climate change, including provisions to reduce greenhouse gas emissions,

Concerned by the recent high levels of PM2.5 air pollution in the developing world, particularly in South and East Asia,

Noting that air pollutants such as carbon monoxide, sulfur dioxide, nitrogen oxides, ozone, particulate matter and lead have been scientifically proven to cause a range of health ailments, particularly among the young and elderly,

Realizing that reduction in greenhouses gas emissions must also come with a concurrent program of air pollution reduction to improve quality of life and reduce health care costs for developing nations,

Further noting that the three biggest sources of air pollution are energy production, industrial manufacturing, and transportation,

1. Requests each Member State to legislate and enforce industrial policies that will help to limit the amount of air pollution, reduce greenhouse gas emissions, and encourage development of technologies and processes that are more efficient and pollute less through means such as but not limited to:

- a. passing and enforcing strict regulations of emissions of known air pollutants in amounts to be set by individual states' environmental protection agencies but not exceeding the standards set by the European Union,
- b. creating an air pollution tax for all manufacturing businesses, whose proceeds shall be used to provide subsidies for air-pollution reduction measures, including:
 - i. scaling the tax based on size of the company and average amount of yearly emissions of air pollutants,
 - ii. allowing for reduction of said tax when businesses demonstrate reduction of emissions,
 - iii. ensuring that no legal loopholes for tax evasion are allowed,
 - iv. engaging in government or government-sponsored measurements of pollution levels and not relying on industry self-analysis,
- c. providing subsidies for factories and other manufacturing businesses that improve the efficiency of their processes and reduce the emission of pollutants, including:
 - i. installing improved filtration systems,
 - ii. using less toxic but potentially more expensive materials for production,
 - iii. improving manufacturing and emission systems with newer technology approved by individual states' environmental protection agencies,

- d. offering tax incentives for those companies that switch to or increase their manufacturing of green technology, with particular emphasis on:
 - i. green transportation, such as electric cars and buses,
 - ii. green energy, such as wind and geothermal,
 - iii. green packaging, such as biodegradable boxes, bags, and other wrappings;

2. Recommends each Member State to evaluate and improve their energy policy with the specific goals of reducing both air pollution levels and greenhouse gas emissions through methods such as but not limited to:

- a. creating a higher consumer carbon tax in those areas where energy is supplied by fossil fuels such as oil, coal, and natural gas,
- b. increasing tax rates for high levels of home and industry energy use, including:
 - i. setting up heaviest tax rates for high-energy use, low-efficiency areas,
 - ii. offering discounts for demonstrated reduction in energy use over a period of one year or more,
- c. passing strict regulations on all fossil fuel generated power stations, including:
 - i. passing and enforcing strict regulations on emissions to conform with the international standard set by the European Union,
 - ii. creating heavy penalties and fines for failure to comply with standards,
- d. providing tax incentives for overall reduction of emissions of both known air pollutants and greenhouse gasses,
- d. authorizing subsidies for both individual consumers and businesses that convert to green energy sources such as geothermal, wind, or tidal;

3. Encourages all Member States to continue to develop and evaluate their transportation policy so as to affect an overall reduction of emissions and reliance on fossil fuels through means such as but not limited to:

- a. phasing out diesel and two-stroke engines by:
 - i. subsidizing buy-back programs to encourage consumers to switch to more energy-efficient and less polluting forms of transportation,
 - ii. legislating yearly incremental increase in taxes on such engines,
 - iii. planning for an eventual total ban on such engines,
- b. subsidizing increases in public transportation, with particular emphasis on non-polluting or less-polluting systems such as electric buses, light rails, subways, elevated trains, and high-speed rails,
- c. ending all subsidy programs or tax incentives for traditional fossil fuel-burning transportation, including:
 - i. cancelling all auto-industry subsidies except for those related to electric automobiles,
 - ii. stopping all creation of new roads and highways and instead redirecting such monies to creation of more public transportation;

4. Affirms that all Member States should meet in yearly summits to discuss climate change, air pollution, and energy policy, with an eye toward averting climate change related disasters and reducing the overall emissions of air pollutants and greenhouse gasses.
